

AR Holo Card — print & cut

Print at 100% scale. Each card is 90 × 57 mm (standard business card). Glue front and back together, or just use the front.

FRONT — 3D building

BACK — room layout

How to use: scan the QR with a phone → tap Start AR → allow camera → point at the card. Flip the card to switch to the room layout. You can also test without printing: open [card.html](#) on a computer screen and point the phone at the screen.
